Easy to use – everyday

The Sensaphone WEB600 is so easy to use just about anyone can figure it out. If not, we offer free tech support to walk you through it.

We've got a sensor for that

Sensaphone has a sensor for monitoring everything from climate conditions to security and more.

Your business is our business

With over 350,000 systems installed worldwide, we've put Sensaphone to the test in just about every application imaginable.

Suggested Applications

Residential

Know that the temperature, humidity, or other conditions in your home are okay while you're away.

Small Computer Room

Use your WEB600 to monitor temperature, power failure and other conditions that are critical in many computer room applications.

Ultra Low Cold Storage

Don't wait until the morning to find out your freezer has stopped running. The WEB600 will e-mail as soon as the temperature rises above a temperature you set.

WEB600

Features and Specifications

Power

Comes with a plug in power supply that also monitors for power failures.

Battery Backup

Rest easy knowing that even if the power goes out, the WEB600 will keep monitoring.*

Ethernet

Receive an e-mail or text message** when an alarm has been detected. Or check the status on the WEB600's web page.

LEDs

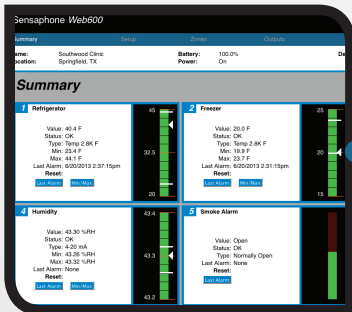

Know everything is okay by simply looking at the WEB600.

Output

Switch on a light or horn to alert anyone nearby there's a problem.

Inputs

Accept six different inputs from a wide variety of sensors. A list of popular sensors and accessories is below.

Web Services

Program, adjust and monitor the status of the sensors on a webpage the WEB600 creates. If datalogging is needed, the WEB600 stores and displays 100,000 samples.

* Battery backup sold separately ** Also delivers alarm messages through SNMP and Modbus
